TITLE	Statewide Report for Arizona Pupil Achievement Testing [and] Appendix to the Statewide Report for Arizona Pupil Achievement Testing.
INSTITUTION	Arizona State Dept. of Education, Phoenix.
PUB DATE	Jun 93
NOTE	330p.
PUB TYPE	Statistical Data (110) -- Reports - Evaluative/Feasibility (142)
EDRS PRICE	MF01/PC14 Plus Postage.
DESCRIPTORS	*Academic Achievement; *Achievement Tests; Counties; Elementary Secondary Education; Grade 4; Grade 7; Grade 10; Language Arts; Limited English Speaking; Mathematics; National Norms; Reading; School Districts; Scores; State Norms; *State Programs; *Testing Programs; *Test Results
IDENTIFIERS	Arizona; *Arizona Pupil Achievement Testing; Iowa Tests of Basic Skills; Tests of Achievement and Proficiency

ABSTRACT

In the 1992-93 school year, the 13th year of the Arizona Pupil Achievement Testing Program, the State Board of Education mandated testing at grades 4, 7, and 10. The Iowa Tests of Basic Skills (ITBS) were administered to grades 4 and 7 and the Tests of Achievement and Proficiency (TAP) at grade 10. Pupil scores are reported by subject, subtest, and skill at the pupil and classroom levels for the state. Scores are then aggregated to the school, district, county, and state levels. A total of 144,858 Arizona students were tested, with 3,723 students of limited English proficiency exempt from the test. Norms used in 1992 were based on national pupil performance in the 1987-88 school year. The 1992 Arizona student performance in reading comprehension was below the national average in grade 4, but was above the national average in grades 7 and 10. In language usage and expression, average Arizona student performance was below the national average in grade 4, but above it in grade 7. Language was not tested in grade 10. Average mathematics scores for Arizona were below the national averages in grades 4 and 10, but higher in grade 7. A slight decrease was noted in grades 4 and 7 when compared to 1991 scores. Ten tables and 6 figures present result summaries. The appendix to the statewide report consists of the following: Appendix A gives the fall 1992 percentile ranks for individuals in reading for both the ITBS and the TAP by state, county, district, and school. Appendix B contains the fall 1992 percentile ranks for individuals for language usage and expression for the ITBS in grades 4 and 7. No language test was given in grade 10. Appendix C presents the mathematics results in terms of percentile ranks for individuals for the ITBS in grades 4 and 7 and the TAP in grade 10. Each appendix contains 48 pages of tables, for a total of 144 tabular pages. (SLD)

MEMORANDUM

TO: Members of the Forty-first Legislature
State Board of Education Members
County School Superintendents
Superintendents and Heads of Districts

FROM: C. Diane Bishop C Diane Bishop
State Superintendent of Public Instruction

SUBJECT: Fall 1992 Arizona Pupil Achievement Testing Statewide Report

It is a pleasure to provide you with this copy of the Fall 1992 Arizona Pupil Achievement Testing Statewide Report. This test is mandated by Arizona Revised Statutes Section 15-741 at three grade levels. The State Board of Education selected specified subtests in grades four, seven and ten to be tested in the Fall of 1992.

• 1535 West Jefferson, Phoenix, Arizona 85007 •

INTRODUCTION

This is the thirteenth year of the Arizona Pupil Achievement Testing Program which is administered to fulfill the requirements of Arizona Revised Statutes Section 15-741 through Section 15-744. This legislation mandates that a nationally standardized norm-referenced achievement testing program in the subjects of reading, grammar, and mathematics be adopted and implemented for use in Arizona schools. The legislation exempts the testing of specified groups of handicapped pupils. A revision of the law passed in 1982 allows the governing board of a school district to exempt pupils who are limited English proficient for up to three years.

For the 1992-3 school year, the Arizona State Board of Education mandated testing at grades 4,7, and 10. Under contract with the Riverside Publishing Company, the *Iowa Tests of Basic Skills (ITBS)* were administered at grades 4 and 7 and the *Tests of Achievement and Proficiency (TAP)* at grade 10. For Arizona, pupil scores are reported by subject, subtest, and skill at the pupil and classroom levels. Scores are than aggregated to the school, district, county, and state levels.

A total of 144,858 Arizona pupils in grades 4,7, and 10 were tested during the period of September 21-25, 1992 in the mandated achievement testing program. A total of 3,723 pupils who are limited English proficient were exempted from testing. The statewide data reported herein for grades 4, 7, and 10 are based on the performance of the tested pupils who were enrolled in 1,076 schools in 217 districts involved in the mandated testing program.

This report briefly describes the tests, subtests, test scores, and reports that fulfill the requirements of the legislation as implemented by the Arizona Department of Education. It summarizes the Fall 1992 Arizona statewide results across grades and within grades. Discussions of pupil achievement strengths and weaknesses and demographic characteristics are included.

DESCRIPTION OF TESTS

The *ITBS* and *TAP* are nationally standardized achievement tests. A standardized test is one that has been administered to a representative sample of pupils selected from across the nation. The test is administered using specific instructions under specific testing conditions. The scores that result from this controlled test administration become the norms that are used by test users to compare individual pupil or pupil group performance to that of the national average performance of pupils and groups of the same age and grade on the same achievement test. The scores of Arizona pupils in 1992 are compared to the norms of the 1987-88 standardization of the *ITBS* and *TAP*.

The 1992 testing program required the administration of selected subtests contained in the *ITBS* and *TAP* batteries. These subtests are indicated in Table 1. Tables 2 and 3 indicate the number of items for each subtest on the *ITBS* and *TAP*, respectively.

Table 1
Subtests Administered
ITBS* and *TAP
1992

ITBS Grades 4 and 7	Vocabulary (V)
	Reading Comprehension (R)
	Language Usage and Expression (L-4)

Mathematics	**48**

DEMOGRAPHIC INFORMATION

The following five variables were collected for each pupil during the test administration:

- **Sex**
- **Primary Language**
- **Limited English Proficient (LEP) in Programs by Model**
- **Racial/Ethnic Background**
- **Continuous Number of Years Enrolled in the District**

The collection of this information makes possible the analysis of test results for specified groups of pupils. Information on the variables of Sex, Primary Language, and Racial/Ethnic Background is reported in the following tables:

Grade 4	Table 6	Page 20
Grade 7	Table 8	Page 23
Grade 10	Table 10	Page 26

DESCRIPTION OF REPORTS

The results of the Arizona Pupil Achievement Testing Program are reported at six levels:

- **Pupil**
- **Classroom**
- **School**
- **District**
- **County**
- **State**

Pupil

Two sets of reports are produced for each pupil in grades 4 and 7: **Individual Performance Profile** and **Pupil Home Report.**

Individual Performance Profile. The report is designed for use by the classroom teacher and describes individual pupils' performance by skill, subject, and subtest.

Pupil Home Report. This report presents test results to parents and guardians. The narrative portion explains the numeric scores to the parent. A graphic display identifies a pupil's strengths and weaknesses.

For the grade 10 pupils, the **Individual Performance Profile** was distributed to classroom teachers and to parents.

Classroom

Two reports are provided which list individual pupil scores in classroom groupings: **Classroom Report and Classroom Performance Profile.**

Classroom Report. This report lists the pupil's test scores. It can be used to compare pupil and total class performance with that of the norm group. Individual pupil and class strengths and weaknesses are identified.

Classroom Performance Profile. This report lists pupils' performance by subtest and identifies pupil strengths and weaknesses.

School

Three reports are produced for each school: **School Report, Building Performance Profile, and Analysis by Variables Report.** The **School Report and Building Performance Profile** are similar in concept, format, and function to the classroom reports. These two reports list teachers within a school and the average scores earned by their classes.

The **Analysis by Variables Report** displays the subtest results schoolwide by grade for each of the five demographic variables:

- **Sex**

    Male
    Female

- **Primary Language**

    English
    Spanish
    Spanish Exclusively
    Navajo
    Navajo Exclusively
    Other
    Other Exclusively

- **Limited English Proficient (LEP) in Programs by Model**

    Transitional Bilingual K-6
    Secondary Bilingual 7-12
    Bilingual/Bicultural K-12
    English as a Second Language (ESL)
    Individual Education Program

- **Racial/Ethnic Background**

    White (not of Hispanic origin)
    Black (not of Hispanic origin)
    Hispanic
    American Indian or Alaskan Native
    Asian or Pacific Islander

- **Continuous Number of Years Enrolled in the District**

    Less than 1
    1 but less than 2
    2 but less than 4
    4 but less than 6
    6 but less than 8
    8 but less than 10
    10 to 12
    More than 12

District

Five reports are produced for each district:

- **District Report**
- **District Skills Report**
- **Analysis by Variables Report**
- **District Summary Report**
- **Frequency Distribution of Percentiles**

The **District Report** and **District Skills Report** parallel those described in the previous sections except that score averages are listed by school.

The **Analysis by Variables Report** provides a districtwide analysis of each variable by grade.

The **Frequency Distribution of Percentiles** displays the cumulative percentage of Arizona pupils achieving at each national percentile rank.

The **District Summary Report** displays the district's score averages by subtest and subject together with the county, state, and national averages.

County

Five reports are produced for each county. These are similar to those described in the District section above except that district data are aggregated to their respective county level.

State

Five reports are also produced for the state. Once again, these reports are similar to the district report descriptions given above but with district data aggregated to the state level.

DESCRIPTION OF REPORTED SCORES

Four types of scores are used to report the test results presented in the Statewide Report:

- **Scale Score**
- **Grade Equivalent**
- **Percentile Rank**
- **Stanine**

Scale scores and grade equivalents are examples of *developmental* scores. Developmental scores are used when comparisons of pupil performance within a reference group, such as groupings by grade or age, are required or desired.

Percentile Rank and Stanines are *status* scores. They allow us to compare the relative status or rank of a pupil's performance within a given group of pupils, such as a class, district, state, or nation.

Scale Scores (Developmental)

The Developmental Standard Scores (DSS) for *ITBS* and *TAP* generally range from approximately 1 to 300. They are continuous across all levels and forms of a specific test. Since they are built on equal-interval scales, the magnitude of a given difference between two scores represents the same amount of difference in performance wherever it occurs on the scale; i.e., the difference between DSS scores of 50 and 55 represents the same amount of difference as between DSS scores of 160 and 165.

When using scale scores one should expect higher scores as well as greater variability among scores from grade to grade. It is important to point out that while DSS scores are equivalent across forms and levels of the same test they are not equivalent from one subject to another. It is possible to meaningfully compare scale scores for Reading Comprehension from grade 7 to grade 10 but not to compare scale scores for Reading Comprehension to those for Written Expression.
The major use of scales scores is to measure achievement growth from grade to grade or from year to year.

The DSS score for *ITBS* and *TAP* are linked to form continuous scales for grades K-12 as follows:

ITBS Reading Comprehension (Levels 7-14)/*TAP* Reading Comprehension (Levels 15-18)
ITBS Language Total (Levels 7-14)/*TAP* Written Expression (Levels 15-18)
ITBS Mathematics Total (Levels 7-14)/ *TAP* Mathematics (Levels 15-18)
ITBS Work Study Total (Levels 7-14)/*TAP* Using Sources of Information (Levels 15-18)
ITBS Complete Composite (Levels 7-14)/*TAP* Basic Composite (Levels 15-18)

The DSS scores for Mathematics Problem Solving in grades 4 and 7 are not directly comparable to DSS scores for Mathematics in grade 10.

Grade Equivalents (Developmental)

A grade equivalent score (GE) represents the typical performance of pupils tested in a given month of the school year. For example, a grade equivalent of 53 represents the score achieved by the median pupil in fifth grade after three months of instruction. On the *ITBS*, GEs range from P0 (prekindergarten) to 139. GEs on the *TAP* extend above 139. These extensions should be considered similar to a scale score, which permits growth comparisons to be made, rather than representing a median level of instruction.

The GE should be regarded as an estimate of where a pupil is along a developmental continuum but not where the pupil should be placed in the graded organization of the school. For example, a third grader taking a third grade mathematics subtest might earn a GE of 59. This means that this third grade pupil scored as well as an average pupil in the ninth month of the fifth grade would score on the third grade test. This score is above average for third grade but does not mean that the pupil is capable of doing fifth grade work successfully.

Percentile Ranks (Status)

A percentile rank (PR) indicates a pupil's status relative to other pupils in a defined norm group. They range from 1 to 99 and give the percentage of pupils in the norm group who achieve lower scores. Thus, if a pupil receives a PR of 63 it means that 63% of the pupils in the norm group scored lower than this particular pupil. PRs have no interpretive meaning in themselves. They must always be used in conjunction with the norm group. Most often the norm group is the group of pupils in a given grade that were part of the national standardization group.

PRs are not built on equal interval scales and so the difference between a PR of 10 and a PR of 15 is not the same as the difference between PRs of 50 and 55 in terms of pupil ability. Another way of saying this is that the PR scale is nonlinear. For example, a DSS of 130 may be associated with a PR of 17 while a DSS of 140 on the same test may be associated with a PR of 20 (10 points difference on DSS = 3 points difference on PR). However, a DSS of 120 may be associated with a PR of 63 while a DSS of 130 on the same test may be associated with a PR of 80 (10 points difference on DSS = 17 points difference of PR).

Two types of percentile ranks are reported for the 1992 Arizona Pupil Achievement Testing Program: *individual* PRs and *group* PRs. *Individual* percentile ranks were reported for individual pupils on class lists returned to the schools. They are also used for the group data (sex, primary language, racial/ethnic, etc.) reported for analyses by variables. Both *individual* and *group* percentile ranks were reported for class, building, and district summaries returned to school districts. *Group* percentile ranks may be used to report total state achievement summaries and comparisons with national averages.

Percentile Rank (Status)

cont.

When interpreting percentile rank data, it is important to keep in mind the characteristic differences of the individual PRs and the group PRs. First, individual PRs are developed from the distribution of individual pupil scores in the standardization sample. Group PRs, as the name implies, are derived from the distributions of *averages* of schools in the standardization sample. Remember that groups distributions will tend to have a narrower range than individual distributions because each school *average* score is always higher than the lowest pupil score and lower than the highest pupil score.

Second, the distribution of individual percentile ranks is much larger than the distribution of group percentile ranks because each group contains many individuals. For these reasons, the distributions of group PRs are much less variable than the distributions of individual PRs. The relationship between pupil and group percentile ranks is shown in the table that follows. The data in this table are based on Reading Comprehension, Grade 7, 1988 *ITBS* Fall norms.

Pupil or Average GE Score	Pupil PR	Group PR
103	95	99
83	71	86
77	60	66
72	50	44
66	39	22
56	21	3
48	10	1

Stanines (Status)

Stanines are normalized standard scores with a mean of 5, a standard deviation of 2, and range from 1 to 9. Stanines may be regarded as rather broad groupings of percentile ranks as shown in the table that follows:

PRs	Stanine
96 and up	9
89 - 95	8
77 - 88	7
60 - 76	6
40 - 59	5
23 - 39	4
11 - 22	3
4 - 10	2
less than 4	1

Unlike PRs, stanines are approximately equal-interval scores. This means that the difference between stanines 2 and 4 represents about the same difference in ability as the difference between stanines 5 and 7. This property allows stanines to identify broad performance categories as follows: stanines 1, 2, and 3 indicate below average performance; stanines 4, 5, and 6 indicate average performance; and stanines 7, 8, and 9 represent above average performance.

EXEMPTIONS FROM STATEWIDE TESTING

Conditions under which pupils may be exempted from the statewide testing program are specified in Arizona Revised statutes Section 15-744 as listed below:

(1) Pupils who are limited English proficient (LEP) may be exempted for up to three years.

(2) Pupils who are disabled as defined in the categories below and whose individual educational plan states that parts or all of the testing requirement would be detrimental to the pupil may be exempted from the testing requirement:

- trainable mentally handicapped
- educable mentally handicapped
- visually handicapped
- hearing handicapped
- multiple handicapped
- seriously emotionally handicapped
- learning disabled
- not required to attend regular classes in a school

The governing board of a school district may exempt pupils who are limited English proficient and who are enrolled in an instructional program as prescribed by Section 15-754 from the nationally standardized norm-referenced achievement testing requirement not to exceed three consecutive years. The first year of the exemption is the first academic year in which the pupil is enrolled in a school district in this state in grade two or above. The instructional program for limited English proficient pupils who are exempt from the nationally standardized norm-referenced achievement testing requirement as provided in this subsection shall include an alternative assessment of achievement to be administered annually pursuant to standards prescribed by the state board.

School districts shall annually report the number of pupils, by category and by grade level, which were exempt as provided in this section to the Department of Education. The Department shall include this information in their annual report to the Legislature pursuant to Section 15-743.

At the request of a pupil's parent or guardian, the governing board of a school district shall administer any test required by this Article to pupils exempted from the testing requirement pursuant to this Section. Test results for these pupils shall not be included in the summary results of tests prescribed in Section 15-743, but individual results shall be sent to the school and to the parent or guardian.

In Fall 1992, a total of 3,723 pupils who are classified LEP were exempted from the statewide testing program. The primary language of 92.9% of these pupils is Spanish.

The numbers of first-, second-, and third-year exempted pupils are provided in the following table. This table also lists the number of pupils in the other categories, by grade level, who were exempted from the testing requirement.

Table 4
Number of Exempted Pupils
1992

Category	Grade 4	Grade 7	Grade 10	Total
Language	**1,921**	**994**	**808**	**3,723**
1st Year-Spanish	664	602	511	**1,777**

Not Required to Attend Regular Classes	**47**	**2**	**4**	**53**

SUMMARY OF STATEWIDE PERFORMANCE ACROSS GRADES

The *ITBS* and *TAP* were used in the 1992 Arizona Pupil Achievement Testing Program. The *ITBS* was administered in grades 4 and 7 and *TAP* in grade 10.

The norms used in 1992 were based on national pupil performance in the 1987-88 school year.

When comparing Arizona average scores across years or with the national norms, it is important to remember that small score differences may not always indicate meaningful differences in achievement. For example, the degree of variability in the scores at any grade level or location in the distribution may have a large impact on the interpretation to be placed on observed score differences within that grade.

Figures 1, 2, and 3 graphically compare Arizona statewide grade-equivalent averages in Reading, Language, and Mathematics with national averages. For grades 4 and 7, comparisons are also made with the averages obtained in 1991. *These comparisons are not shown for grade 10 because tenth graders were not included in the 1991 statewide program.*

The 1992 Arizona pupil performance in Reading Comprehension is shown to be below the national average in grade 4, but above the national average in grades 7 and 10. Reading performance declined from 1991 scores in grades 4 and 7. *There is no comparison with 1991 performance because the tests were not administered to tenth graders the previous year.*

In Language Usage and Expression, average Arizona pupil performance was below the national average in grade 4, but above it in grade 7. The 1992 average scores were lower than the 1991 scores in both grades. *Language was not tested in grade 10.*

Average Arizona scores in Mathematics were below the national averages in grades 4 and 10, but higher in grade 7. A slight decrease was noted in each of grades 4 and 7 when compared to 1991 scores.

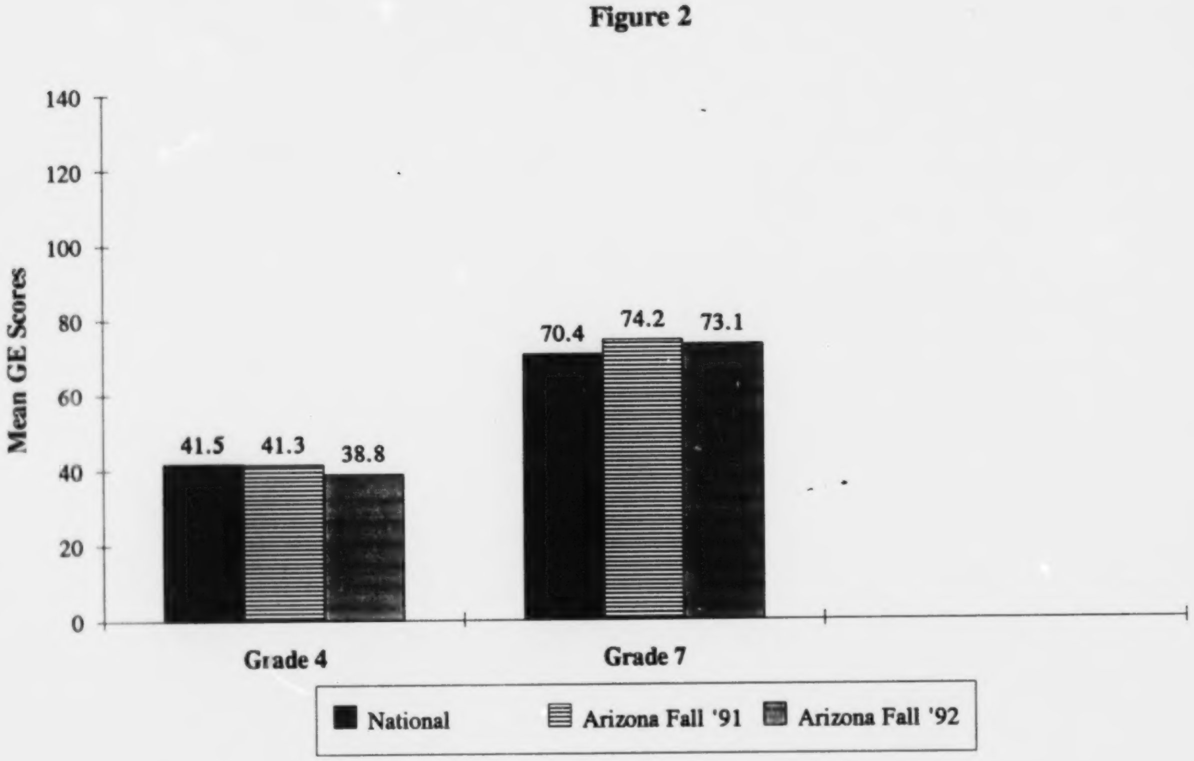

Figure 3

SUMMARY OF STATEWIDE ACHIEVEMENT BY GRADE

The sections that follow present grade-by-grade discussions of pupil performance in each of grades 4, 7, and 10. For each grade, strengths and weaknesses based on average percentile-rank scores are discussed. For grades 4 and 7, achievement gains are reviewed based on scores obtained on the same subtests in the 1991 administration. Achievement gains are not available for grade 10 because tenth graders were not included in the 1991 statewide testing.

Each discussion is augmented by a graph and two tables. The tables report:

- Average scores for the 1992 grade groups and the national norms group using national percentile ranks for individual pupils.
- Average scores for the 1992 grade groups and the national norms groups using national percentile ranks for groups (schools).

  The above two tables can be found on the following pages:

Grade 4	Table 5	Page 19
Grade 7	Table 7	Page 22
Grade 10	Table 9	Page 25

- Analyses of scores by group variables:

  sex
  primary language
  race/ethnicity

  The above tables can be found on the following pages:

Grade 4	Table 6	Page 20
Grade 7	Table 8	Page 23
Grade 10	Table 10	Page 26

GRADE 4

Strengths and Weaknesses. Average scores for Arizona fourth graders were below the national averages in all four subtests administered statewide. Average percentile ranks ranged from 42 in Vocabulary to 44 in Reading Comprehension, Language Usage and Expression, and Mathematics Problem Solving. Grade-equivalent scores ranged from 38.8 on the language subtest to 40.1 on the mathematics subtest.

Achievement Gain. Average scores on all four of the subtests administered in 1992 declined from those scores obtained in 1991. The declines ranged from as much as six percentile ranks in Vocabulary and Reading Comprehension to three in Mathematics Problem Solving. While there is no obvious explanation for these substantial score drops, a subsequent analysis revealed that the percentages of pupils completing three of the subtests (Vocabulary, Reading Comprehension, and Mathematics Problem Solving) declined by 9% in 1992. It is very likely that scores on these subtests declined in large part because fewer pupils completed the subtests. It remains unclear why this occurred because the identical subtests were administered in 1991 without this problem. The percentage of pupils completing the language subtest remained approximately constant for both years.

Figure 4: Comparative Performance for Grade 4

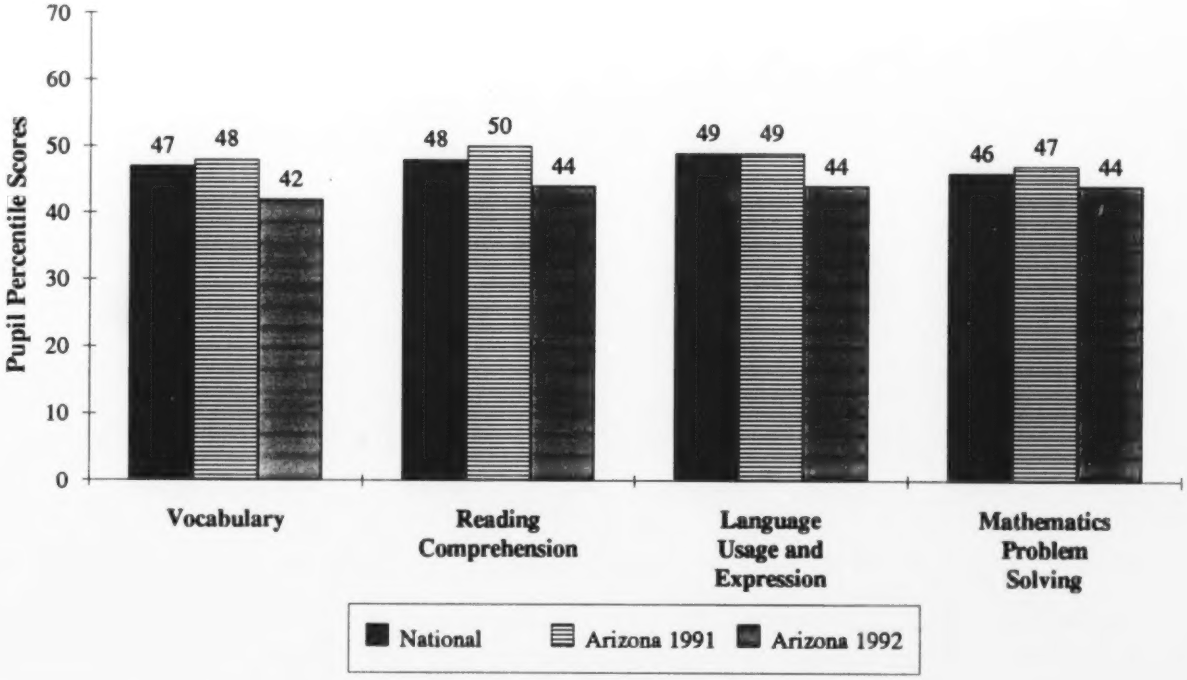

Table 5
Comparisons of Arizona Averages and *ITBS* 1988 National Norms
Grade 4
1992

Individual Norms

	National Norms			Arizona Averages		
	Grade Equivalent	**Percentile Rank**[a]	**Stanine**	**Grade Equivalent**	**Percentile Rank**[b]	**Stanine**
Vocabulary	40.8	46	5	39.1	42	5
Reading Comprehension	41.5	48	5	40.0	44	5
Language Usage and Expression	41.5	49	5	38.8	44	5
Mathematics Problem Solving	40.7	46	5	40.1	44	5

[a] Percentile ranks are for individuals. Percentile ranks for national values have been interpolated.

[b] Percentile ranks for state averages have been obtained by rounding average grade equivalents to the nearest whole number and converting them to percentile ranks from a conversion table.

Group Norms

	National Norms			Arizona Averages		
	Grade Equivalent	**Percentile Rank**[a]	**Stanine**	**Grade Equivalent**	**Percentile Rank**[b]	**Stanine**
Vocabulary	40.8	37	4	39.1	29	4
Reading Comprehension	41.5	40	5	40.0	32	4
Language Usage and Expression	41.5	43	5	38.8	31	4
Mathematics Problem Solving	40.7	41	5	40.1	37	4

[a] Percentile ranks are for group averages. Percentile ranks for national values have been interpolated.

[b] Percentile ranks for state averages have been obtained by rounding average grade equivalents to the nearest whole number and converting them to percentile ranks from a conversion table.

GRADE 7

Strengths and Weaknesses. As a group, Arizona seventh graders scored above the national average on Reading Comprehension, Language Usage and Expression, and Mathematics Problem Solving. The Arizona average scores were as much as four percentile ranks higher than those for the national norms group. On Vocabulary, the Arizona group scored two points lower than the norms group. Average grade-equivalent scores ranged from 69.2 on Vocabulary to 73.1 on the language subtest.

Achievement Gain. In comparison to 1991 scores, the 1992 Arizona seventh-grade group ranked 3 percentile points lower on Vocabulary and Reading Comprehension and 1 point lower on the language and mathematics subtests. While the drop in percentages of pupils completing the subtests was not as striking as described earlier for the fourth grade, drops of 7% and 6% were noted for the reading and mathematics subtests, respectively.

GRADE 10

Strengths and Weaknesses. The 1992 group of Arizona tenth graders obtained a Reading Comprehension score at about the national average. Although their grade-equivalent average was one month higher than that of the national norms group, both of these scores convert to a national percentile rank of 49. In mathematics, however, the Arizona group scored lower than the national group.

Achievement Gain. These comparisons cannot be made because Arizona tenth graders were not included in the 1991 statewide testing program.

GENERAL SUMMARY OF FINDINGS

Arizona pupils collectively scored in the average range in reading, language, and mathematics across all three grades. In general, they performed at about the same level of achievement as average pupils in the same grades across the nation, based on the 1988 national norms.

Gender

- Average reading scores for females were higher than those for males at all grade levels. The differences ranged from 3 months at grade 4 to 4 months at grade 7 and 6 months at grade 10.
- A similar pattern was observed for language, where administered.
- In mathematics, the male group outscored the female group by 1 month in grade 7 and by 4 months in grade 10. In grade 4, there was little difference in the scores of the two groups.

Racial/Ethnic

The racial/ethnic classifications used were White, Black, Hispanic, American Indian/Alaskan Native, and Asian/Pacific Islander. Of the Arizona pupils included in mandated testing, the white group comprised approximately 55% of the total number of pupils tested; the Black group, 3.7%; the Hispanic group, 22.6%; the American Indian/Alaskan Native group, 6.8%; and the Asian/Pacific Islander, 1.6%. No racial/ethnic background was indicated by approximately 9.9% of the pupils tested.

The White and Asian/Pacific Islander groups scored at or above the national average across all grade levels.

The Black, Hispanic, and American Indian/Alaskan Native groups scored below the national average in all subject areas at all grade levels. The Hispanic and Black groups scored at approximately the same level on all subtests at all grade levels. The Black group slightly outscored the Hispanic group in language in grades 4 and 7 and in reading in grade 10. The reverse was true for grade 10 in mathematics. Both of these groups scored higher than the American Indian/Alaskan Native group in all three areas.

Statewide Achievement

- Arizona pupils scored in the average stanine range in all subject areas at all three grade levels.
- Reading Comprehension performance was above the national average in grades 7 and 10, and below the national average in grade 4.
- Language Usage and Expression performance was above the national average in grades 4 and 7.
- Average scores on the mathematics subtests were above the national average in grade 7, but below the national average in grades 4 and 10.
- Females tended to outscore males in Reading Comprehension and Language Usage and Expression (administered in grades 4 and 7 only). Gender differences were smaller in mathematics, where the male group tended to outperform the female group.
- The White and Alaskan/Pacific Islander groups scored at or above the national averages for reading, language (administered in grades 4 and 7 only), and mathematics at all grade levels.

Contents

This is the thirteenth year of the Arizona Pupil Achievement Testing Program which is administered to fulfill the requirements of Arizona Revised Statutes Section 15-741 through Section 15-744. This legislation mandates that a nationally standardized norm-referenced achievement testing program in the subjects of reading, grammar, and mathematics be adopted and implemented for use in Arizona schools.

To fulfill these legislative requirements for the 1992-3 school year, the Arizona State Board of Education mandated testing at grades 4, 7, and 10. Under contract with the Riverside Publishing Company, the *Iowa Test of Basic Skills (ITBS)* were administered at grades 4 and 7 and the *Tests of Achievement and Proficiency (TAP)* at grade 10.

The following table indicates the subtests of the *ITBS* and the *TAP* which were administered to fulfill the requirements of the Arizona Pupil Achievement Testing Program:

Mandated Subject	Grade	Test/Subtest
Reading	4,7	*ITBS*/Reading Comprehension
	10	*TAP*/Reading Comprehension
Language	4,7	*ITBS*/Language Usage and Expression
	10	No language subtest was administered to grade 10
Mathematics	4,7	*ITBS*/Mathematics Problem Solving
	10	*TAP*/Mathematics

The Fall 1992 Percentile Ranks (PR) for each of the required subtests in the testing program are developed from the distribution of individual pupil scores. On the *ITBS*, PRs for individuals are derived from the mean Grade Equivalent (GE). On the *TAP*, the PRs for individuals are derived from the mean Developmental Standard Score (DSS).
